PAVILION RULES AND REGULATIONS

CHIEF STEWARD IN THE PAVILION: Adele Schweicker 0439 722 386

PLEASE READ YOUR SCHEDULE CAREFULLY

1. All Exhibits are to be the absolute bona fide work of, or grown by, the exhibitor named on the entry form.
2. Exhibits shall not bear any identifying mark of ownership.
3. Pavilion will be closed to the public during the judging of exhibits.
4. The Judge's decision shall be final.
5. The Judge shall have the power to say if any exhibit be not worthy of a first prize.
6. Where there is only one (1) entry the judge may award a first prize if the exhibit is of sufficient merit.
7. The steward, under the direction of the Chief Steward, reserves the right to move an article from one class to another or from one section to another within the pavilion classes.
8. Please note the Pavilion will be closed at 4:00 pm on Show Day and will reopen at 4:30 pm for the collection of exhibits and trophies. No exhibits can be removed earlier.
9. The Society will take care of all exhibits but shall not be responsible for any accidental damage or loss of exhibits; nor for any exhibitors not collected.

HINTS AND TIPS FOR EXHIBITORS

FRUIT, VEGETABLES AND EGGS

- Fruit/vegetables should be typical of the variety mentioned in the schedule, free from disease, insect or other damage. The fruit/vegetables should be uniform in shape and size and be clean, bright and free from dust. There should be no blemishes. Take off bad leaves.
- Vine grown produce must have stalk left on.
- Root vegetables must retain their leaves.
- **Citrus fruits** should have stems cut close to the surface of the rind leaving green plump sepals. A tip with citrus fruit is that freshly picked fruit usually has a thicker pith, which is not desirable. Colour should be shiny and glowing, with no scale. Segments should be plump with good taste
- Eggs should be clean and uniform in size, colour and shape. Do not wash eggs as this removes the natural bloom. Use of clean nesting material in the days before the show is best, but if really necessary, a slightly damp cloth may be used to clean eggs.

COOKING AND JUNIOR COOKING

- Read your recipe and always weigh or measure ingredients accurately.
- Never use a packet cake mix - unless stated in Schedule.
- It is most important to use fresh ingredients, especially the shortening.
- Use caster sugar for finer textured cakes.
- To grease the tin, use a very light spray of oil or smear a tiny dab of butter on paper towel and rub it over the inside surface, just enough so that the baking paper will stick to the tin.
- For a round tin, trace around the bottom of the tin onto the paper and cut it out slightly smaller to fit inside the tin. Put two or three rectangular pieces of paper around the sides, slightly overlapping, as this will help movement of the paper as the cake rises during cooking.
- For a square tin, lay a baking paper strip across the tin, covering two sides and the

base, then overlay with another strip at right angles, so there are two layers on the bottom and ensuring that each side is covered.

- Do not use a skewer to test a cake as it leaves a hole.
- No wire rack marks on any side of cake. The marks are regarded as decoration. Instead, turn cake onto a board covered with tea towels.
- Do not put cakes in plastic containers or bags before judging as this can draw moisture - use cellophane for best results.
- Do not trim the cake.
- Use correct tin size or shape as stated, e.g. bar tin.
- All ordinary cakes are to be iced on top only. But read the schedule carefully noting iced or not
- The Judge is looking for cakes with firm, even texture without airholes. The top, sides and base should be even in colour. The height of the cake should be in proportion to tin size. All entries will be judged on fineness, neatness and appearance.
- The judge reserves the right to cut cakes for judging and tasting unless stated otherwise
- **All biscuits** should be the same diameter and height. The best way to make sure they are equal is to weigh the first ball of dough then replicate for each one. Judges check on consistent size by comparing the bases of each biscuit.
- **Novelty cake** is a fun, amusing, odd-shaped, non-traditional cake - not to be cut
- **Decorated cake** is either round, rectangular or square and decorated with icing and other edible decorative items
- **Lamingtons** - Use butter cake mix, uniform size 4cm (1½ in) square.
- **Chocolate Cake** - Fine soft mixture. Blend cocoa with a little hot water and cool before adding to mixture.
- **Orange Cake** - Fine even texture, golden brown and well flavoured with orange.
- **Patty Cakes** - Moist fine texture, peak to rise above paper.
- **Plain Sponge** - No butter, both layers same thickness with same mixture. Do not use cornflour in sponge cakes, unless it is stated in the Schedule. Weigh sponge mixture for even heights of layers. Do not use a ring tin unless stated in the Schedule. Do not over-flavour, especially soda.
- **Pavlova** - Marshmallow in centre, no colour.
- **Scones** - Dainty 4 to 5 rounds with uniform shape and colouring, free from excess flour. No flour on top, Glaze with butter after cooking. Best cooked on day of judging
- **Fruit Cake** - Cut all fruit currant size. Round tins are better than square (except for AgShows NSW/VASL Senior Fruit Cake Competition where **square** tin is required) and cakes best made three weeks before Show to allow maturing. Drop cake on bench to even out cake batter before baking. Too hot an oven causes cracks.

CAKE FREEZING POINTS

- For Show work - never freeze sponge cakes, fruit cakes or shortbread. Fruit cakes and shortbread improve in flavour by keeping them out of the freezer.
- Most cakes are suitable for freezing. Make sure the cake has cooled thoroughly before freezing. Wrap tightly with cling wrap so there is no air between the cake and the wrapping. You can either put the cake in a dish or just wrap in paper to freeze.
- Thaw the day before the Show wrapped in a towel to absorb any moisture, then ice if required by the Schedule.

- Biscuits freeze well. Wrap Show biscuits in cello-paper. Put each pack into a plastic dish and freeze. To thaw, take dish out of freezer and leave in air tight container until ready to use
- Scones can be frozen, but must be taken out the morning of the Show and wrapped in a tea towel

JAMS, CONDIMENTS AND PRESERVES

- Jams not to be exhibited in small jars, smallest approx. 250 gm
- Jam should taste of the fruit it is made with. Too much sugar or overcooking hides the true flavour.
- Jam should have an even consistency with a bit of stiffness but not be too chunky.
- The jar should be spotlessly clean on the outside and the lid should not have jam underneath. Open jars before exhibiting to check contents for mould, dirty lids etc
- Use sterilised jars with new lids, as lids can hold smells from previous contents, which are more pronounced after heating or storage
- All exhibits must be clearly dated and labelled
- All sauces to be in Sauce Bottles
- Pickled onions and clear pickles may be exhibited in fancy jars.
- Strain lemon butter
- Jars of Preserves to be completely full.
- Overripe fruit is not suitable to preserve.
- Preserves not tasted - judged on appearance
- Fruit - uniform in size, no blemishes and should be bright in colour
- Clarity of the contents of the jar will also be judged
- Good proportion of syrup and solids, free from air bubbles
- Fruit should resemble the fresh fruit - hold their shape.

NEEDLEWORK AND JUNIOR NEEDLEWORK

- Needlework must not be washed
- Work must be that of the exhibitor, within the last two years
- Any identification on an article must be covered
- Work should be clean and well-presented and should conform exactly to the Schedule.

Sewing and Patchwork:

- Stitching and seam finishes should be uniform throughout the garment.
- Open seams or overlocked seams should be used for most garments. Generally, french seams for lingerie, baby wear and blouses.
- facings - attached, clipped to stitching and caught down only on seam points
- hems - either blind or French hem
- collars and lapels same length
- button holes right direction
- Machine work must show straight, even stitching with seams neatly matched and hems exactly even.

Crochet and Knitting:

- The overall appearance of the exhibit should be attractive, fresh and clean.
- The pattern, choice of yarn and tension should be suited to the purpose of the finished item, e.g., soft yarn for baby wear or a firm tension for work wear and socks.
- The finished garment or article should be wearable (if appropriate) and well designed. For example, neck openings neither too big nor small, appropriate sleeve length.

- The piece must demonstrate that the knitter's technique is competent, with the exhibit displaying no holes, loose stitches, dropped stitches, long threads, knots or joins in the middle of rows.
- The colour harmony, choice and difficulty of the pattern and techniques selected to create the garment will be assessed in determining the aesthetic appeal of item.
- Fine crochet such as doilies should lie flat with no puckering.

Tapestry and Embroidery are judged on evenness, neatness and straightness of stitching. Quite often the inside finishes of an article help the judge decide between two equally good exhibits.

Embroidery: Your entry should be attached with pins to coloured cardboard (the colour to complement work). Work should not be started or finished with knots - it should be invisibly finished. A tip is to press embroidery well from both sides, with padding underneath when pressing the wrong side.

Cross stitch: The stitches on the reverse side should go all the same way. All stitches on the right side must have the top of the stitch going in one direction

HANDICRAFTS

- The exhibits in the craft section are many and varied, but the judge will be looking for original work. Much depends on the finish of the exhibit.

VASL COOKING, HANDICRAFT AND PHOTOGRAPHY

- **Professionals are not eligible to compete**

CUT FLOWERS

- Truss - Bunch or cluster of flowers on top of stem
- Spike - Flowers down the stem
- Cut Flowers have soft wood
- Shrub has hard wood
- Flowers must be out
- Pansy best with a collar, the same size as pansy
- Camellias best to sit up in a glass jar
- Flowering shrub to be no more than 20 cm high
- Cut item to stand up straight
- Make sure all containers are clean with no stain marks, spider webs or cracked pots.
- Pots to be free from ants, snails etc
- If any entry says potted plant, only one plant used
- If entry says potted plants, more than one plant used
- Plants to be healthy with no dead flowers or seedpods and no weeds growing in pots

- No copy work will be considered.
- Maximum size of exhibit (including frame) 100 cm x 60 cm
- Check size required in the current Schedule as this may be subject to change.
- Limit of two entries per class per exhibitor. Entries must be ready for hanging.

The quick sly fox jumped over the lazy brown dog.

Section 3: Year 2 - Pencil

Section 4: Year 3 - Pencil

Alice was beginning to get very tired of sitting by her sister on the bank, and of having nothing to do: once or twice she had peeped into the book her sister was reading, but it had no pictures or conversations in it, 'and what is the use of a book,' thought Alice 'without pictures or conversation? --- (Lewis Carroll - Alice in Wonderland)

Section 6: Year 5 - Pen

Section 7: Year 6 - Pen

There was nothing so very remarkable in that; nor did Alice think it so very much out of the way to hear the Rabbit say to itself, 'Oh dear! Oh dear! I shall be late!' (when she thought it over afterwards, it occurred to her that she ought to have wondered at this, but at the time it all seemed quite natural); but when the Rabbit actually took a watch out of its waistcoat-pocket, and looked at it, and then hurried on, Alice started to her feet, for it flashed across her mind that she had never before seen a rabbit with either a waistcoat-pocket, or a watch to take out of it, and burning with curiosity, she ran across the field after it, and fortunately was just in time to see it pop down a large rabbit-hole under the hedge. --- (Lewis Carroll - Alice in Wonderland)

NATIONAL SHEEP HEALTH DECLARATION - EXPLANATORY NOTES

Overview

Completing this National Sheep Health Declaration (NSHD) will assist prospective buyers to make an informed decision about the health status and management history of these sheep. The NSHD is mandatory for all sheep movements in SA and for sheep being moved into NSW and Tasmania. It is voluntary in other states.

Livestock Production Assurance (1)

Livestock Production Assurance (LPA) program accreditation means that a property must have a biosecurity plan for the property. [The National Farm Biosecurity Reference Manual for Grazing Livestock Production](#) can be used to develop plans or further information including templates is available at: www.farmbiosecurity.com.au/extension/aha-livestock-extension/property-biosecurity

Footrot (3 and 4)

Scald and footrot cause a spectrum of disease to sheep feet especially in wet, warm environments. Scald (or ovine interdigital dermatitis) is usually mild inflammation between the hooves. Footrot is an infection caused by the bacterium *Dichelobacter nodosus*, which breaks down the tissue between the horn and the foot and can result in painful separation or 'underrun' of the sole especially with the more virulent form.

Virulent footrot is defined differently in each state. For information on this and interstate movements of sheep, producers should visit the relevant state department website or contact animal health staff from that department.

4. If answered Yes, all mobs should have been inspected during the last spread period, and any lameness investigated, with no signs of the disease observed. If answered no, producers should include any information about the disease and their management of it; e.g. whether any testing has been carried out, or what treatments may have been used recently.

Lice (5)

All mobs should be checked for lice at least twice each year. Any sheep seen with rubbed fleece or pulled wool should be checked for lice as a matter of urgency. Further information is available at: www.paraboss.com.au

Approved Vaccinate (7)

A sheep that is identified by an NLIS (sheep) 'V' tag and is:

- vaccinated with an approved JD vaccine by 16 weeks of age, OR

- vaccinated with an approved JD vaccine after 16 weeks of age, when the flock:
 - was in the SheepMAP, or
 - had undertaken a negative Faecal 350 test in the two (2) years preceding the vaccination, or
 - had a Negative Abattoir 500 status at the time of vaccination.

SheepMAP (8)

An audited quality assurance program incorporating a property biosecurity plan, animal health risk assessment, testing, and movement controls that provide a source of low risk animals. Note - the level of testing varies depending on the status. Date of last test should be recorded in Q9.

Types of tests that may be recorded (9)

Faecal 350: A test of 350 representative sheep over 2 years of age (or all sheep over 2 years of age in smaller flocks) by Pooled Faecal Culture (PFC) or High Throughput Johne's (HT-J) PCR in pools of up to 50 sheep. The sheep must have been on the property for at least 2 years.

Abattoir 500 (or 150): At least 500 (or 150) sheep, over 2 years of age, have been submitted to an abattoir in the past 24 months, in 1 or more lots, have been examined and all found negative for JD. The sheep must have been on the property for at least 2 years.

Other relevant health information (10)

Any other information that the consigner thinks may be relevant can be recorded here; e.g. any other management practices carried out for JD, participation in an active grower group, One Biosecurity, or other biosecurity initiatives, mulesing status, pain relief usage, etc.

Declaration

Signing this declaration has legal significance under fair trading and other relevant state legislation. Regulatory authorities may also take legal action, and purchasers may seek damages for any information that is incorrect. Before signing you must be satisfied you understand all elements of the document, and these explanatory notes.
